

Hi.

This is coronavirus.

We cannot see it.

**It is very small and
makes some people sick.**

It can

make us cough,

feel hot and cold,

**give us a
sore throat**

**and make it
hard to breathe.**

Everyone is different.

**Some people will get
a little bit sick.**

**Others might get
very sick and go to
the hospital.**

**Coronavirus moves
through our spit,
coughs and sneezes.**

**Then onto people
or things.**

**So it is important we
stop it from moving.**

We need to:

- 1 Cover our coughs and sneezes with a tissue or our elbow.**

2 Wash our hands with soap and water before we eat and after play.

**Remember to sing
'Happy Birthday'
two times.**

**3 Stay at home
from school if
we are sick.**

4 Clean tables,
toys and door
handles at home.

5 Try not to touch our mouth and eyes, pick our nose or bite our nails.

We also need to make sure we are not too close to others.

**We should be able to
spin around without
touching anyone.**

**Things might be a bit
different for a while.**

This means we cannot do things that we normally do like playing with our friends or playing sport.

**Adults may be
feeling sad but this
will not be forever.**

**We can talk about our
feelings together.**

**Doing all of these things
can help stop it moving**

**So we can all play with
our friends and family
again soon.**
